Sent	1 Oct 2025 11:48:05	+64274797423	One that you understand that you had no reason to disagree with me about Whittakers.
Sent	1 Oct 2025 11:35:25	+64274797423	I want to have that kind of talk.
Sent	1 Oct 2025 11:34:45	+64274797423	The only times we argued, where when you were about to breach the contract, or you weren't helping me and that's why we're in an argument. All the time, any time we argued. I have a mind for business, I was trying to show you that. With the letter, I honestly believe if we did what I want when I tried to start it, we would still be in business, seriously. If you had any idea of the trade, accepting a printer to reject a pallet of material without trying to run it, is stupid. Flexo trade concentrates on that fact, I bet I could have printed all those rolls they rejected. Maybe I should have just said that.
Sent	1 Oct 2025 11:24:54	+64274797423	Bottom line is, you know what I'm going through, you know would start early whether I got paid for it or not, and in total I have done more than enough free hours over my time to cover Tuesday with my daughter, and you are now saying you don't think I was working. Do you think I should be ok with that? That i even had to use callouts to cover it. I know i am a hard worker. I have all the proof to show it. You should have just said don't worry about Tuesday, you work hard enough.

I just want to be able to talk and deal with my personal problems with a clear head, what I have asked is honestly the only way I can do it, I have tried for years other ways of distracting myself. The only thing that works is being at work if only for a short time. I know I won't have a choice next month, so I am trying to get myself prepared for that. Sent	17 Jul 2025 15:26:59	+64274797423	Hi Noel, just thought I should let you know that by default, i believe proven effort in a workplace should be rewarded, i know there are factors that complicate this belief, but that is why I keep bringing up Glen. If it was up to me, he would have been made operator before I went to Singapore. Muzema, i would have got rid of a soon as i had 9 people. I in no way have ever treated him like that though, but he does enough in a year to justify it. Unfixable
Sent	17 Jul 2025 07:53:00	+64274797423	Sorry, taking serge
Sent	17 Jul 2025 07:25:33	+64274797423	Will do 👍

Sent	4 Oct 2024 04:11:44	+64274797423	Hi Noel, just letting you know I have been at work since about 1130pm trying to get line 2 running well. Sent	3 Oct 2024 15:44:55	+64274797423	I just read the email from Alex, I will ask him to come in when he next available, and see if the fault is still there. If it's not we can get him staying the options to safeguard the line from more of this.

Sent	30 Sept 2024 07:57:16	+64274797423	Morning Noel. I am likely to finish the day early again, feeling a bit helpless atm. Not really prepared to talk about it either as I will have a meltdown

Sent	27 Sept 2024 14:44:33	+64274797423	It's OK, we won't rush it. I will give a full email report on line 2 next week

Sent	27 Sept 2024 14:37:46	+64274797423	Regarding Musema, I think it best that you talk to Riki first, as he has spoken to myself and Musema. Get what he thinks of it

Received	26 Sept 2024 20:33:40	+64274797423	Just like they question you regarding the camera you should be questioning and hold them accountable for the work that is not done and produced in the department 😞
Received	26 Sept 2024 20:27:31	+64274797423	Correct, we can discuss more tomorrow
Sent	26 Sept 2024 20:25:15	+64274797423	Might have to do something, there is nothing they can do. As long as we state the only cameras for safety are the outside ones, the clocking is for tracking temps, and the lab is for quality and communication purposes
Received	26 Sept 2024 20:24:30	+64274797423	Because I can tell you if we don't fix it corporate will do it for us , and that normally does not end up well
Received	26 Sept 2024 20:23:27	+64274797423	I'm happy to have a letter drawn up and ensure that this is the case
Received	26 Sept 2024 20:22:41	+64274797423	Correct , 👍
Sent	26 Sept 2024 20:21:53	+64274797423	Same, it's pretty much all I'm saying to them. If you don't want to be recorded, stay out of the lab. Simple

Received	26 Sept 2024 20:20:54	+64274797423	Just remember the lab is solely a work area , I'm happy to make that very clear to all of them and explain to all of them why they need to stay on the line all the time , regarding the amount of NCR's and waste coming out of extrusion, I'm more than happy for them to convince be otherwise
Sent	26 Sept 2024 20:20:18	+64274797423	Yeah I know, I am trying to educate about the legalities them before they realise that they are wasting their time. Nothing can be done to stop cameras along as we follow the rules
Received	26 Sept 2024 20:17:59	+64274797423	I wouldn't entertain the convo regarding the cameras , they not up and running at the moment and we can finalise more detail when I'm back
Sent	26 Sept 2024 14:19:20	+64274797423	Looks like an older drive, fingers crossed
Received	26 Sept 2024 14:16:24	+64274797423	Hopefully Annant's spare part works

Sent	26 Sept 2024 14:10:09	+64274797423	It would not be wise to run the line with the drive giving a fault.
Received	26 Sept 2024 14:10:03	+64274797423	Get Alex in tomorrow if needed
Sent	26 Sept 2024 14:09:08	+64274797423	The deflate drive has a fault. Annant thinks we have a spare. I am not sure if he is going to get Alex to try and swap them over. I asked Alex if he will be in tomorrow, and he said if needed. I told him we need to get the line running.

Received	25 Sept 2024 15:15:48	+64274797423	Ok will call you in about 10min just on my scorecard meet at mo
Sent	25 Sept 2024 15:15:13	+64274797423	No, that would be too much waste. Would stop and be on stand by. Most likely have another line running at same time.
Received	25 Sept 2024 15:14:04	+64274797423	Does that mean that line 2 will drool during the warmer temps
Received	25 Sept 2024 15:13:34	+64274797423	That will be great Joe and will be appreciated
Sent	25 Sept 2024 15:05:33	+64274797423	If our plan later is to do evening runs, I am willing to adjust my start time to accommodate for it. But Tuesdays and Thursdays I have plans every week in the arvo

Sent	24 Sept 2024 16:50:12	+64274797423	I am not frustrated or annoyed by Annants decision with line 2, I'm just making sure you are aware I am masking my decisions based on the schedule.
Sent	24 Sept 2024 15:54:30	+64274797423	Yeah, he's been studying the plc programs, thanks for the update
Received	24 Sept 2024 15:48:35	+64274797423	Alex only available on Thursday , Annant and Elkin aware as well, Apparently he has been doing some work already for the line 2 problems
Sent	24 Sept 2024 14:52:53	+64274797423	Yeah, even though there were significant challenges last week, I felt at peace as I was in full control of the department
Received	24 Sept 2024 14:48:10	+64274797423	Last week was challenging and you guys done well under the circumstances, Remember not all days are the same and things go upside down at times, Some things are outside of your control , make sure what you can control is going well. Also Annant is challenging at times and I guess you have to keep up communication with him Discuss more tomorrow
Sent	24 Sept 2024 11:10:54	+64274797423	Sorry for bailing today, just need to get my head around how annant operates again, aside from the breakdowns I think i had a very good week last week

Sent	23 Sept 2024 16:58:38	+64274797423	Exactly
Received	23 Sept 2024 16:57:06	+64274797423	Just remember you have the support at work and HR as well that can support , you not alone but you have to be very clear with the extrusion staff regarding expectations and continue to follow up on instructions
Sent	23 Sept 2024 16:56:47	+64274797423	The biggest thing, is I know he has potential, it's sad really. And I also feel for chenda, I can tell he's over him.
Received	23 Sept 2024 16:55:34	+64274797423	I know it's frustrating however that's what you will have to deal with when looking after staff , every company has that " one " employee however we have a few to deal with, but I'm up for that challenge too
Sent	23 Sept 2024 16:27:07	+64274797423	But I have finally had enough of it now.
Sent	23 Sept 2024 16:25:12	+64274797423	While it's on my mind. The thing that upsets me the most with Musema, is regardless of how much the team complained about him, I still have him the respect any worker deserves. Multiple chances, tried to guide him, but it's like a slap in the face.
Received	21 Sept 2024 18:42:03	+64274797423	That's great , fingers crossed for a good run tonight 🙏 thanks
Sent	21 Sept 2024 18:40:16	+64274797423	Janak has just informed me that line 2 is back and running

Received	19 Sept 2024 08:49:41	+64274797423	Both lines running well , Janak has everything under control
Received	19 Sept 2024 08:11:14	+64274797423	Hopefully we keep a family running into the cabinets will help
Sent	19 Sept 2024 08:10:12	+64274797423	Yeah I will, didn't sleep well really. The main concern I have is having line 2 prepared for potential overheat in the arvo (offset by having non barrier running at the time is gets warm)
Received	19 Sept 2024 08:08:12	+64274797423	Don't rush in lie in abit this morning
Received	19 Sept 2024 08:07:54	+64274797423	Morning Joe I haven't been over yet as I just got in , I'm going over now and will let you know
Sent	19 Sept 2024 08:03:54	+64274797423	Good morning Noel, I know I should already know, but how are the lines.?
Sent	19 Sept 2024 01:54:50	+64274797423	I think I know how to fix the powder issue though. The units need to be above the die. The starch is getting stuck on its way up the pipe, causing another dump situation when it finally has too much in the hose.
Sent	19 Sept 2024 01:32:48	+64274797423	Line 2 is running. No issues like in the afternoon. Massive issues with the powder unit though. The line is set up making very nice profile. They will make rolls with breaks, just can't justify not doing it that way.

Sent	11 Mar 2020 21:03:35	64274797423	Looks like it came loose with all the opening and closing of the guard
Sent	11 Mar 2020 21:02:56	64274797423	That one is just held on with 2 bolts and lock nuts. One of the nuts has gone somewhere, I managed to find one to replace but it's not a lock nut

Sent	12 Feb 2020 22:52:32	64274797423	I will set up the next job as much as possible, kinda worried I won't have solvent to clean it up
Received	12 Feb 2020 22:51:21	64274797423	I will do further investigation tomorw.Never before have we used in a 12hr period over 200litres of solvents for a job, that's crazy , definately a major issue
Sent	12 Feb 2020 22:47:25	64274797423	I can only put it to the haters drying out the inks too fast, we did finish the job over twice as fast as the jet would though, would the difference in solvent be that as well?
Received	12 Feb 2020 22:45:31	64274797423	That's ridiculous, basically we use more solvents than ink for that job

Sent	12 Feb 2020 22:43:25	64274797423	I was literally at the pumps 2x as much for the run last night and today
Sent	12 Feb 2020 22:42:23	64274797423	That chicken job goes through twice as much solvent
